Education

Brigham Young University – Idaho

Sept. 2020 – Dec. 2025

Bachelor's Degree in Computer Science with an emphasis in Machine Learning ·

GPA: 3.23

- **Senior Project** – [Physics-Based Music Visualizer](#): One-click audio-to-video generator with real-time playback. Written in C++ using GLFW and OpenGL.
- **Team Leader** – [Pie Agenda App](#): Led team of 8 in building an app for Android/iOS/Windows. Written in Dart using Flutter. Designed class system and UX/UI, delegated tasks, and kept us on schedule.
- **Team Leader** – [Game: Wall of Fire](#): Led team of 3 to create a 3D side-scroller in Python. Ranked #1 for best graphics.
- **Academic Highlight**: Improved GPA while taking 20 final credits.

Bloom Institute of Technology

Nov. 2022 – Oct. 2023

Certification in AWS Backend Development

- **Senior Project** – ASCII-to-Image Markdown Renderer: AWS Lambda calls in Java for DDB uploads of rendered images; frontend in JS and HTML.

Experience

Freelance Full Stack Website Contractor ☆

Oct. 2024 – Present

- Engineered a serverless E-commerce site with auto-emailing, Braintree payment handling, and a backend using AWS Lambda, S3, API Gateway, and SES. Hosted on GitHub Pages as a responsive, componentized React site and designed for security, maintainability, and efficiency. Made for the company [Scripture Creations](#).
- Created simple websites for [Edefying](#), [TDL Construction](#), and [Dara Luci](#). Used React, Elementor, or Weebly.

Participant, IBM Hackathon

Feb. 2026

- Introduced to creating a workforce of agentic AI using watsonx Orchestrate. Produced pipeline which automatically updates Python or JS code projects to latest compatible dependencies.

Web Dev Intern, Degasolutions LLC

June 2025 – Dec. 2025

- Developed 90% of UI for a cross-platform mobile application using C#, MAUI, and MudBlazor.

AI Tester, Outlier

Oct. 2023 – Aug. 2024

- Authored coding prompts and solutions to train AI models.

Additional Experience

Feb. 2021 – Nov. 2024

- Delivery Driver, FedEx – Performed faster than 90% of workforce.
- Cold Call Agent, Credit.com – “Agent of the Week” Award
- Eagle Scout Award: Oct. 2019.

Skillset Overview

Languages: Java, Python, C#, C++, C, JS, Dart, SQL, HTML, CSS, and Kotlin.

Frameworks & Tools: REST APIs, HTTP, Docker, React, Flutter, .NET, GitHub, WordPress, Nginx, AWS Lambda, VS, VS Code, Android Studio, and AWS API Gateway.

Skills: Leadership, independence, algorithmic problem-solving, debugging, and optimizing time-use and code.

Personal Projects

- **TCP Data Saver: C / Android Integration:** Developed a C-based TCP server that receives URL requests from Android app clients and returns clean, and minimal HTML page for in-app rendering.
- **[Custom Text Art Game Engine](#):** Use of OOP principles, file I/O, UX design for internal sprite and map applications, built-in map chunking, collision detection, etc. 3,000 lines of Python running at 1,000 FPS.
- **[Minecraft AI Bot](#):** Automates gameplay using video input. Written in Java and prototyped in Python with image-to-text processing.
- **[3D Voxel Simulation](#):** Python with Tkinter, asynchronous input, and algorithmic texturing
- **[MIDI Piano Live Visualizer](#):** Real-time MIDI-input painter written in 10 hours.
